

## In

*In* refers to someone or an object that is inside something.

*"Debugging sessions often occur **in** the quiet corner."*

*"The team gathers **in** the huddle room for quick discussions."*

## On

*On* means that something is in a position that is physically touching, covering or attached to something.

*"The codebase is hosted **on** the company's server."*

*"The meeting minutes are documented **on** the shared drive."*

## Above / Over

*Above* and *Over* have a similar meaning. The both mean "at a higher position than X" but above normally refers to being directly (vertically) above you.

*"The dev places sticky notes **above** the monitor to track important tasks"*

*"The team's goals are written **above** the project board as a reminder. "*

## Under / Below

*Under* and *Below* have a similar meaning. They mean at a lower level. (Something is above it).

*"The developer's chair has wheels for easy movement **under** the desk."*

*"The coding books are stocked neatly **below** the bookshelf."*
