How to ask a question

The formula for asking a question in the simple past tense is **did + [subject] + [root form of verb]**.

*"**Did** you **test** the software extensively to ensure its stability?"*
*"**Did** they **modify** the database structure to improve efficiency?"*
*"**Didn't** she **automate** the testing process using specialized tools?"*

Some commonly used regular verbs by Devs

analyse	implement	optimize	deploy	validate
create	test	refactor	maintain	integrate
design	debug	document	upgrade	customize
develop	modify	collaborate	automate	troubleshoot

2- Complete the sentences using the regular verbs on the parentheses:

1. We _____ (test) the software carefully before release.
2. She _____ (debug) the program due to time constraints. (negative)
3. _____ he _____ (attend) the team meeting this morning? (interrogative)
4. They _____ (collaborate) with other developers on the project.
5. _____ you _____ (review) any code yesterday? (interrogative)
